

Online Training

Online training with CEUs

- Online training courses for the individual student or for thousands, depending on your need
- Continuing Education Units (CEUs) awarded
- SCORM compliant
- Complete Learning Management System or customized for your existing LMS
- Fully branded for your organization

While continuing to utilize the engaging video approach to learning that has built our reputation, our Online Learning Center delivers instruction for the individual student or for thousands, at a fraction of the cost of traditional classroom training. Save money and time by subscribing your group of first responders to one course or a whole library of courses that can be taken any time, anywhere. Priced according to the number of students taking the course. Free demo courses available.

These popular Emergency Film Group titles are among the 100 courses available

Video On Demand

Video on Demand brings our award-winning films to your computer, streamed instantly and reliably to your desktop.

With Video on Demand, you will see the video streamed in its entirety. VOD is SCORM compliant and can be used on your Learning Management System. VOD can be played on any computer capable of playing flash videos.

We are making additional videos available each month. If you are particularly interested in one of our programs, please contact us and we will make every effort to make that program available in the shortest time frame possible.

Here is the best part - each video is only \$19.95 per view. And volume discounts apply, so please call for details.

Some of our most popular titles now available:

- Air Monitoring
