"Intermodal Containers"

Copyright 1995, Detrick Lawrence

About intermodal containers

Intermodal containers are containers which can be used interchangeably in different modes of transportation. Examples of intermodal containers include both tank and box containers. More than four million such containers are in use around the world, with that number increasing ever rapidly.

Problems may arise when hazardous materials are packed - whether properly or improperly - inside intermodal containers and external markings are not present to warn workers or emergency responders of the contents.

About the program

"Intermodal Containers" provides information for emergency responders and industry personnel who work with or who may respond to emergencies involving intermodal containers. This program describes how intermodal containers are constructed and used, shows how accidents happen, and suggests procedures for safe response to emergencies involving both tank and box containers. It explains the standards for IMO Type 1, Type 2, Type 5 and Type 7 containers and discusses features of specialized containers.

Safety procedures to minimize accidents during loading and unloading operations are covered thoroughly, and suggestions for avoiding common accidents are offered. For emergency response situations, information is provided on identifying hazardous materials, using protective clothing, isolating the accident scene, and managing leaks and fires. 28 minutes.

About the series

Container Emergencies is a multi-title

series designed to help emergency responders deal with accidents involving different types of containers. Program Two, "Petroleum Storage Tanks," provides information for emergency responders and industry personnel who work with or who may respond to emergencies involving petroleum storage tanks. Program Three is "Cylinder," which covers safety issues regarding compressed gas cylinders.

About the technical committee

Emergency Film Group programs are created with the assistance of leaders in emergency response training. Technical committee members for "Intermodal Containers" include the following authorities:

Bob Baron (dec.), Former Director of Safety and Security, Steamship Trade Association. Bob developed and conducted safety training courses for longshore and stevedore personnel and participated in the development of safety and health regulations affecting the cargo handling industry.

Bill Hand, Captain, Houston Fire Department (ret.); currently a member of the Harris County Emergency Response Team.

Mike Hildebrand, principal, in Hildebrand & Noll Associates, a hazardous materials consulting firm and former Director of Fire & Safety for the American Petroleum Institute.

Norman Kendall, Depot Manager of North America, Sea Containers of America Inc.

Thomas Lord, Manager of Fleet Regulatory, SeaLand

Greg Noll, Senior Partner with the hazmat consulting firm Hildebrand & Noll Associates and a member of the NFPA Technical Committee on Hazardous Materials Response. Greg writes and lectures extensively about hazardous materials.

About the filmmakers

Gordon Massingham, director. For over 25 years one of the world's leading creators of emergency response training. Winner of more than 140 national and international awards.

Jane Christopher, producer and editor. Well known to emergency response audiences for programs, Jane has received several awards for filmmaking excellence.

About the Emergency Film Group

Emergency Film Group, a division of the Detrick Lawrence Corp., was established to distribute quality training films for emergency response and right to know education. Firmly committed to accuracy, EFG uses the best qualified advisors and production crews to ensure that programs are not only exciting to watch, but are also accurate in every detail.

EFG's worldwide list of customers range from the largest petrochemical companies, to government agencies, to small town fire departments. Every film comes with EFG's 30-day money-back guarantee if the customer is not satisfied.
