EXPLOSIVE & INCENDIARY WEAPONS

About the program

Explosive & incendiary weapons are the most common tool in the terrorist arsenal, accounting for more than 90% of terrorist incidents. "Terrorism: Explosive & Incendiary Weapons" outlines response guidelines for terrorist incidents that involve such weapons as pipe and fire bombs, rockets, hand grenades, suicide missions and vehicles loaded with flammable fuel. It is designed for emergency response and emergency management personnel who may be called upon to respond to an act of terrorism.

The program details the different types of explosives and incendiary devices and tells how terrorists acquire and fabricate such weapons. It also discusses 'dirty bombs,' a device intended to contaminate wide areas with radiation.

Scenarios cover both pre- and post-detonated situations, and response guidelines for both are discussed. Evacuation distances are studied, and size-up issues are examined for both scenarios. Strategic goals are prioritized. Other topics covered include search and rescue, firefighting, dealing with mass casualties, investigation activities, and recovery. A companion *Leader's Guide* that outlines a seminar including objectives, pre- and post-seminar testing, classroom and field exercises, and reference materials that will be of interest to responders is a part of the package.

"Terrorism: Explosive & Incendiary Weapons" was produced with the assistance of the Montgomery, AL Fire Department, Montgomery Police Department, and the Alabama Dept. of Public Safety. 30 minutes.

About the series

"Terrorism: Explosive & Incendiary Weapons" is part of Emergency Film Group's timely *WMD Response Package*. This series is designed for firefighters, hazmat teams, bomb squads, police, EMTs, and other local emergency personnel who are

likely to be at the scene of a terrorist event before federal response agencies arrive. Titles in the series include "Terrorism: 1st Response," "Terrorism: Biological Weapons," "Terrorism: Chemical Weapons," "Terrorism: Explosive & Incendiary Weapons," "Terrorism: Radiological Weapons," "Detecting Weapons of Mass Destruction," and "Response to Anthrax Threats."

About the technical committee

Emergency Film Group programs are created with the assistance of leaders in emergency response training as well as in the subject field. "Terrorism: Explosive & Incendiary Weapons" was created with the help of the following authorities:

Chief Jan Dunbar, recently retired from the Sacramento (CA) Fire Department where he served since 1965. Jan was Division Chief, responsible for developing the hazardous materials response team program. He has served as Chairman of the California State Fire Marshal's committee to develop a hazardous materials specialist course, is a member of NFPA's Technical Committee on Chemical Protective Clothing, and IAFC's Committee on Hazardous Materials.

Chief John Eversole, recently retired from the Chicago Fire Department where he was District Chief of Special Functions. Currently he serves as Chair of the Hazardous Materials Committee of the International Association of Fire Chiefs. Chief Eversole has played a major role in helping to shape legislation impacting the fire service, particularly in the areas of hazardous materials, firefighter safety & terrorism.

Capt. Chris Hawley, retired Fire Specialist with the Baltimore County Fire Department. Currently he is the owner of FBN Training & Consulting, a company that provides emergency response training worldwide. He is an adjunct instructor to the National Fire Academy and the author of several texts on emergency response issues.

Tom Rancich, Principal, Off-shore Consulting, US Navy Seal. Tom served several operational tours with the Navy SEALs and Naval Special Warfare Group, including an assignment as the Expeditionary Antiterrorism Officer for the Commander and Chief of the Atlantic Fleet. He also served as the Combating Terrorism Warfare

Innovation Development Team Deputy and Director of the Navy's Lessons Learned Program at the Navy Warfare Development Command.

Chris Ronay, Executive Director, Institute of Makers of Explosives. Chris served as a Special Agent for the FBI, where he directed the FBI's bombing investigations as Chief of the Explosives Operations Group. For 16 years he was the chief ballistics expert on the Unabomber case. He is a member of the International Society of Explosives Engineers and the International Association of Bomb Technicians and Investigators.

Detective Richard Walsh, Detective Walsh is assigned to the Hazardous Devices Unit of the Baltimore County Police Department. He is a certified Hazardous Devices Technician and has responded to over 1000 calls for service relating to explosives, military ordnance and/or hazardous situations. Detective Walsh lectures on bomb related subjects to government, business and industry and is considered an expert in the department regarding explosives. He is a member of the International Association of Bomb Technicians and Investigators as well as the International Society of Explosive Engineers.

About the filmmakers

Gordon Massingham, President and Director of all Emergency Film Group and Detrick Lawrence productions. Gordon is a former television producer and former manager of the NFPA Film Department. His work has appeared on ABC and PBS, and television stations throughout the country. He has produced more than 120 emergency response training films since 1979. Productions in which he has played a principal creative role have won 130 film festival awards.

About the Emergency Film Group

Emergency Film Group, a division of the Detrick Lawrence Corp., was established to distribute quality training for emergency response and right to know education. Firmly committed to quality, EFG uses authoritative advisors and skilled production crews to ensure that programs are not only exciting to watch, but are also accurate in every detail.

Many programs are now available in both VHS and DVD format.

EFG's worldwide list of customers range from the largest petrochemical companies, to government agencies, to small town fire departments. Every program comes with EFG's 30-day money-back guarantee if the customer is not satisfied.
