"Medical Operations at Hazmat Incidents"

Copyright 2000, Detrick Lawrence

component of that response, the film provides information on setting up the medical sector and prioritizing responsibilities. Other topics covered include protective clothing, medical support of entry team personnel, decontamination of victims, when to delay decontamination, medical treatment of victims, and transportation of the contaminated

patient. 26 minutes.

About Hazardous Materials

Because of the large number of hazardous materials used in modern industrial processes, the potential for human exposure to these harmful products during an unexpected leak, spill or fire is very real. EMTs and other emergency medical units have a number of responsibilities at hazardous materials incidents, and require training in order to better protect the community, the environment, victims and themselves against the dangers of contamination.

About the program

"Medical Operations at HazMat Incidents" is designed to help EMS personnel meet the requirements of NFPA 473, Professional Competencies of EMS Personnel Responding to Hazardous Materials Incidents. The film explains the requirements for Level I and Level II certification, and stresses the need for pre-incident preparation so that EMS units will understand their interactive role within the hazmat response process.

The elements of EMS first responder responsibilities are described, including size-up, identifying the chemical involved, isolating the scene and calling for help. For full-scale emergency response situations where EMS is one

About the technical committee

Emergency Film Group programs are created with the assistance of leaders in emergency response training. Technical committee members for "Medical Operations at HazMat Incidents" include the following authorities:

Mike Hildebrand, hazardous materials consultant with Hildebrand-Noll Associates. Former Director of Fire & Safety for the American Petroleum Institute, Mike is the author of numerous articles and texts.

Brad Learn, Director of Community Affairs for the Louisville (KY) Emergency Medical Service. A hazmat team leader for over 12 years, Brad is actively involved in ATSDR training programs both domestic and international.

Mary Beth Michos, R.N., Chief of Prince William County, VA Fire Dept. and Chair of the NFPA subcommittee on EMS

Response to HazMat Incidents.

Kent R. Olson, M.D., FACEP, ABMT, Medical Director, San Francisco Bay Area Regional Poison Control Center; involved in hazardous materials toxicology for 10 years developing protocols for medical management of hazmat victims.

About the filmmakers

Gordon Massingham, director. For 20 years one of the world's leading creators of emergency response training. Winner of more than 100 national and international awards.

Jane Christopher, producer and editor. Well known to emergency response audiences for programs, Jane has received several awards for filmmaking excellence.

J.B. Lamont, senior editor. J.B. manages the non-linear digital editing capabilities for all Emergency Film Group programs. Previously he held the position of Senior Video Editor for Catholic Communications Corp.

About the Emergency Film Group

Emergency Film Group, a division of the Detrick Lawrence Corp., was established to distribute quality training films for emergency response and right to know education. Firmly committed to accuracy, EFG uses the best qualified advisors and production crews to ensure that programs are not only exciting to watch, but are also accurate in every detail.

EFG's worldwide list of customers range from the largest petrochemical companies, to government agencies, to small town fire departments. Every film comes with EFG's 30-day money-back guarantee if the customer is not satisfied.
